**SENSORY****METAL SERIES - AGMS 53**

Adventure Group Metal Series is a range of accessories consisting of products with different functions. . The series feature both individual and group accessories which allow children to perform intense physical activities while playing and socialising. Different types of activities such as spinning mechanisms, mutual swinging and oscillating elements and various rope balance units, which are children's top choices, are among the accessories.

3 - Layer Coating

Metal parts are comprised of ST 37 Steel with a 3-step metal finish. Sandblasting and solvent-free zinc primer coating and electrostatic powder paint application is inherently corrosion resistant under extreme weather conditions and UV.

Colour Options

Metal RAL color options offer a wide range of colors to meet various design needs. The RAL color system provides durable and long-lasting colors that enhance the aesthetic and functional properties of metal surfaces. These colors are commonly used in industrial applications, outdoor decorations, and architectural projects. For metal surfaces, RAL color options provide both aesthetic and functional solutions, combined with long-lasting, UV-resistant coatings.

CmrRope

CmrRope™ is formed by 6 strands of galvanized wires and a core either steel or fiber. Each strand is tightly braided with Polyester which is adhered to galvanized wires with a patented method to create a solid surface where polyester meets with wires. So extra protection is achieved against friction and vandalism. Surface is extremely abrasion and UV resistant also fire retardant.

Plastic-Coated Sheet Metal

The platforms are manufactured from plastic-coated metal sheets and feature integrated drainage holes. The plastic coating provides additional protection against falls and harsh weather conditions.

HDPE Panels

High quality panels made of HDPE panels are milled to provide a smooth, gently rounded edge. The thickness of the panels varies according to its purpose for floors, roofs, and walls.

ST 37 Metal

ST 37 is a versatile structural steel known for its low carbon content, which allows for easy forming and exceptional weldability. Widely preferred in applications where safety and durability are paramount, such as playground equipment, this metal stands out for its balanced mechanical performance and high load-bearing capacity. Its surface is highly suitable for chrome plating, galvanization, or powder coating, providing superior resistance to outdoor conditions and effective protection against corrosion.

HANGING

To hang in arms is the act of carrying the body with the hands or arms, possible to traverse to another platform or play item.

PULL

To pull is the act of pulling item towards you or you towards an item with one or both hands, or possibly with the entire body.

ROTATE

To rotate involves a vertical or horizontal slower paced turn of the body, facilitated by a piece of equipment.

BALANCE

To balance is to stay upright when walking or standing on a surface that makes this challenging.

SPIN

To spin involves a fast, repeating horizontal or vertical turn of the body on a piece of equipment that facilitates social interaction.

CRAWLING

To crawl is the movement of moving forwards or backwards, cross-coordinating arms and legs, on a horizontal or slightly incline surface.

ACCESSIBLE

These are special areas where children with disabilities can play and have fun and without feeling different.

COLLABORATION

Collaboration is the feature of the playgroup to bring all children together, regardless of gender, enabling them to play and interact around a shared goal.

INTERACTION

It is children's communicating with the play group by touching and feeling.

PUSH

To push is the act of pushing an item away from you with one or both hands, possibly with the entire body.

SLIDE

To slide is the act of moving fast downwards stand on a slide.

RUNNING

Running is an activity that encourages children to interact with the playgroup by running and develop physically.

SOUND-RHYTHM

Sound and rhythm transform children's movements in the play area into an artistic exploration, simultaneously developing both their motor skills and auditory perception.

SITTING

It is an area where children can rest while sitting and have fun.

ROLE PLAY

Role play is motivated through play items that stage a frame, place or environment for acting out make believe or role play scenarios.

ROCK

To rock is the action of rocking back and forth, or sideways, on e.g. a piece of spring equipment.

SWING

To swing is the movement of swinging back forth, of in circular movement, seated, standing or lying, in a unhindered arc.

SOCIALIZE

To socialize is the act of meeting, communicating or cooperating in an activity that stimulates and facilitates social interaction.

GLIDE

To glide is the act of moving from one point to another without shifting the feet, in a horizontal or vertical movement in a seated, lying or standing position, letting gravity do the work.

CLIMBING

To climb is the act of moving upwards, cross coordinating arms and legs, on a vertical or inclined surface or net.

BOUNCING

To bounce is the act of bouncing on a responsive, flexible, elastic or tensile surface.

LOGICAL REASONING

Reasoning is a cognitive process of discovery within the playgroup that enhances children's problem-solving and analytical thinking skills through strategic obstacles and logical steps.
